

## High-Intensity retro-reflective rolls

Product description/features	A glass bead retro-reflective material with a 10 year performance life. It has a High tensile strenght top layer with excellent retro-reflectivity. High weather resistance.
Product use	High performance, durable retro-reflective material intended for use in work zone areas and other areas with a need for a high level of safety. Parking areas, basements etc. Certified to meet BS EN 12899-1:2001

### Technical data

Back carrier	Acrylic
Adhesive	Pressure Sensitive
Adhesion temp.	Best performance between 18 °C to 25 °C (synchronized)
Storage temp.	15 °C to 30 °C with a humidity of 30-60 %
Observation Angle	12°
Entrance Angle	5°
Retro-reflection	cd/lux/m <sup>2</sup> white: 250   Yellow: 170   Red: 45
Temperature range	-20 °C til +60 °C (working temperature)
